

LABELING PRACTICE

Same diagrams as the guide, labels stripped. Fill in from memory, then check against the guide or the key.

1 · Hemostasis — the three steps

1 · _____ Timing/trigger: _____ What happens: _____ Clinical note: _____	2 · _____ Timing/trigger: _____ What happens: _____ Clinical note: _____	3 · _____ Timing/trigger: _____ What happens: _____ Clinical note: _____
---	---	---

Fill in: step name, timing, what happens, and one clinical note per box.

2 · Formed elements — RBC vs WBC vs Platelet

	RBC	WBC	Platelet
A true cell?	_____	_____	_____
Lifespan	_____	_____	_____
Hormone	_____	_____	_____
Cleared by	_____	_____	_____

Fill in every cell from memory before checking the guide.

3 · WBC differential — rank order and proportion

(blank — write each cell type's name below its segment, largest → smallest)

■ _____ %
■ _____ %
■ _____ %
■ _____ %
■ _____ %

Rank order + name each segment. Widths are drawn to true proportion — use that as a clue.

Check your answers against WM360_Wk1_Blood_LABEL_KEY, or against the full guide.
